After joining **Arbor Academy**, I realized how important mentorship is. The team not only taught us skills but also helped us gain confidence. Placement calls started just after 2 months. I am now happily working and paid my fee only after that!

The online lectures at Arbor Academy are well-organized, and the teachers make learning feel personalized even though it's virtual. I appreciate the variety of tools they use, like interactive quizzes and group projects. I would love to see more live discussions, but other than that, it's a great experience.
